Acquiring Course Materials

This list explains what materials are required or optional for each course.

- Students should talk to their site coordinators to see if materials are already available through the school. Otherwise, several purchasing options exist.
- New and used course materials can be purchased by credit card from MBS Direct at <http://direct.mbsbooks.com/apexlearning.htm> or 1-800-325-3252.
- For purchase orders, contact your usual school sources or contact Apex Learning directly at 1-800-453-1454, option 2 or enrollments@apexlearning.com.
- Students can also purchase materials from other sources or borrow them from the library.
- **Prices are subject to change** based on the textbook publishing market. Prices include ground-shipping fees but not tax.

¹A Texas Instruments TI-83, TI-83 Plus, TI-84 Plus, or TI-84 Plus Silver Edition graphing calculator (\$90-\$140) and Guidebook are required for many science and math courses. Call 800-842-2737 to locate a vendor. If you're not familiar with how to use your TI graphing calculator, read and follow Chapter 1 in the Calculator Guidebook to familiarize yourself with the basics. Then read and follow the "Getting Started" sections for the chapters on Function Graphing (for the Algebra, Precalculus, and AP Calculus courses), or the chapter on Statistics (for the AP Statistics course). If you don't have a guidebook with your calculator, you can download chapters from <http://education.ti.com/us/product/tech/83pse/guide/guides.html> (for the TI-83 Plus and Silver Edition), or <http://education.ti.com/us/product/tech/83/guide/83guideus.html> (TI-83) or <http://education.ti.com/us/product/tech/84pse/guide/guidesgs.html> (for the TI-84 Plus and Silver Edition).

²Optional textbooks are referenced in the course, but are not required reading. They are intended as an additional resource, for use as desired.

³Labs are a required part of all AP science courses (in accordance with The College Board's guidelines). Most online AP courses offer students the choice between conducting hands-on lab experiments in the high school science lab or completing dry/virtual labs. Some colleges will only grant credit to students who have completed the hands-on labs and may require a completed lab manual as proof of actual lab experiments. Contact the college(s) for complete credit requirements. For all science courses that include activities to be done in a laboratory setting, Apex Learning requires that students do these activities only in a laboratory setting while supervised by a staff person qualified to supervise laboratory activities. To find out more about the labs and lab materials, go to http://www.apexlearning.com/onlinekit/olc/olc_cat.asp.

⁴General studies science students conduct experiments in the high school lab and at home. School personnel must supervise the labs at school, and students should follow all normal safety precautions for the at-home labs (no adult supervision required). For a list of required lab materials and equipment, go to http://www.apexlearning.com/onlinekit/olc/olc_cat.asp.

⁵Course is designed to use the most widely state-approved textbook, however other state-approved textbooks may also be used.
